CTIS 255

Web Technologies 1
Midterm #1 (120 Mins)

Question: Implement the following web page using *external style*. You can see some (<u>not complete</u>) **hints** about the CSS properties of the page. **For missing properties, you need to find them yourself**. You can, of course, use your own method/properties if you want. This page is responsive, and in mobile version, you need to change several CSS properties (given in the grading part). **You can see screenshots of desktop and mobile versions** in the given zip file. You can also watch what you are supposed to do in *samplerun.mp4*. You will set approximate margins and paddings. The page should look like the given screenshots but it does not have to be exactly the same.

Grading:

(85Pts) Desktop Version (see *desktop-screen.jpg*)

- (25Pts) Top section
  - (5Pts) Logo at top
  - (20Pts) Menu
- (45Pts) Middle section
  - (30Pts) Three Boxes
  - (15Pts) Hover effect on boxes.
- (15Pts) Footer
  - (5Pts) Contact
  - (10Pts) Profile

(15Pts) Mobile Version (see *mobile-screen.png*) - @media screen and (max-width: 700px)

- (5Pts) Remove Menu and Footer
- (5Pts) Show boxes in the middle part in stack order.
- (5Pts) All images are 70% of window width
